

In ten simple steps, we will explain you, in words and pictures, how you can mount your PanoVario® picture frame to the wall. Simply follow our picture gallery.

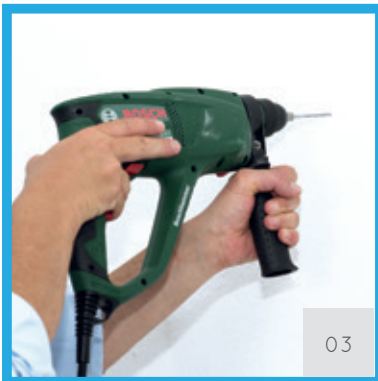

01

Check the delivered mounting parts for completeness. We can also deliver these manufactured according to customer requirements.

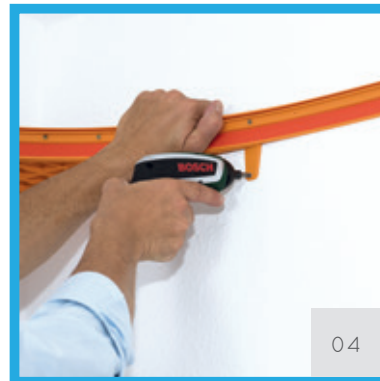

02

Choose the right height on the wall. Level it out with a spirit level and mark your drill holes.

03

Drill holes where you marked their position.

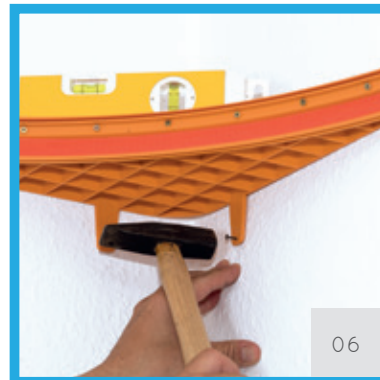

04

Mount the upper corner part using a screw and a Rawlplug.

05

Horizontally fasten the upper rail on the wall with a nail.

06

Fit in the corner bracket and fasten with a nail - in accordance with the picture's height, the lower corner part and the lower rail are now mounted to the wall. (See pictures 2 to 5).

07

Align the lateral rail with the help of a spirit level and fasten it using a nail.

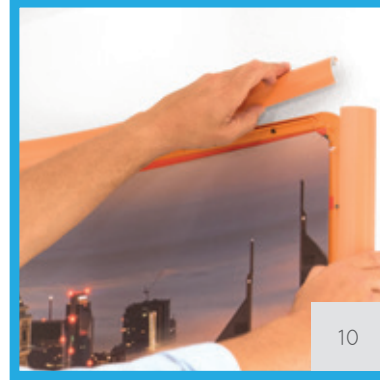

08

Place the frieze band at a right angle on the new picture motif. In doing so, begin at the top left. Then attach the band.

In ten simple steps, we will explain you, in words and pictures, how you can mount your PanoVario® picture frame to the wall. Simply follow our picture gallery.

Now fully attach your picture motif.

Following that, design panel and corners are clipped on. The mounting of your PanoVario® picture frame is now finished.
